WISCONSIN AUTUMN

CURRENT CENSUS RECORDS

OCTOBER 1966

### SECRETARY FREEMAN ANNOUNCES 1967-68 DAIRY SUPPORT

Secretary of Agriculture Orville Freeman today assured dairy farmers that the present support price of \$4.00 a hundredweight for manufacturing milk will be continued through the next marketing year which will begin April 1, 1967. The present support price of 68 cents a pound for butterfat in farm-separated cream also will be continued.

Since prices of milk sold for consumption as fluid milk are closely related to prices of milk used in manufacturing dairy products, today's action also will help maintain prices that farmers receive for milk marketed under Federal milk marketing orders.

"I am announcing the dairy support level for 1967-68 at this time in order that dairy farmers can plan their future dairy herd management with greater confidence as to next year's prices and to provide greater assurance of adequate supplies of milk and dairy products for consumers," Secretary Freeman said.

"Dairy farming requires more advance planning than many other types of farming. As consumers, we can all be grateful that dairy farmers have responded to a long-needed improvement in the prices they receive for milk. September production was only 1 percent below the September 1965 level, whereas production last January and February, was 5 percent below that of the corresponding months in 1965. Today's action should help to spur their improving production trend.

"The added assurance provided by today's announcement should further slow up the exodus of farmers out of dairying, reduce culling of herds, and encourage the raising of dairy calves."

The support price for manufacturing milk was increased from \$3.24 to \$3.50 a hundredweight on April 1 and then to \$4.00 on June 29. The support price is for manufacturing milk of national average milkfat content--

## LAND: OUR MIXED BLESSING

More buyers looking for farms plus fewer farms up for sale. This combination helped to boost total farm real estate value to \$171.1 billion as of March 1, 1966, up 7 percent from a year earlier. Land values are expected to continue rising through late 1966.

The average value per operating unit rose to \$57,100. The range was from \$24,100 in the Appalachian region to \$153,800 in the Pacific States.

The average value per acre rose to \$157 during 1965. State gains of 12 to 15 percent in the Delta and Corn Belt regions pushed the national index of average value per acre to 150 (1957-59=100) on March 1. This was 8 percent above a year earlier and 3 percent above November 1965.

Per acre values ranged from \$54 in the Mountain States to \$321 in the Pacific region. Per acre values by States reflect extremes in type of farming and land quality. They ranged from \$28 in Wyoming to \$693 in New Jersey. Illinois had the highest value in the Corn Belt—\$417—followed by Indiana with \$357, and Ohio and Iowa with about \$315. The average for the Corn Belt was \$306 per acre and \$62,400 per farm. The lowest State value per farm was \$15,700 in West Virginia (\$93 per acre).

Other factors in the land market during late 1965 and

early 1966 were a general decline in the credit supply, somewhat higher interest rates, and more land taken for suburbs, roads, and industrial uses. Such competition for land has, in certain areas, boosted farm prices as much as 50 percent above their agricultural value.

Voluntary land transfers rose to 31 per 1,000 farms in the year ended March 1. This was 8 percent above the previous year and the highest rate since 1959. The tax sale and foreclosure rate was estimated at 1.5 per 1,000 farms. The number of such sales dropped to 2,700, a new low. While the number of complete farm purchases declined 9 percent in 1965, farm enlargements increased slightly. The latter accounted for 54 percent of all transfers reported.

Two-thirds of all farmland buyers during the year were active farmers—both owner-operators and tenants. The percentage of owner-operator buyers rose slightly. The kinds of sellers have changed very little over the past 6 years—active farmers sell about half of the properties and other owners about a fourth. The remaining sales are for estate settlements or by retired farmers.

William H. Scofield  
Economic Research Service

(Continued in November Bulletin)

\* Subject to location differentials where applicable. In the case of members of approved cooperatives, these prices are subject to the deductions authorized by the associations. The prices listed do not include any premium payments which may be paid by handlers and which may bring actual payments in excess of the minimum requirements.

# WISCONSIN FEDERAL MILK ORDER BULLETIN

Published Monthly By  
Federal Milk Market Administrator  
3034 West Wisconsin Avenue  
Appleton, Wisconsin  
for the

Milwaukee, Northeastern and Madison Marketing Areas

This bulletin is primarily to provide producers who are not members of cooperative associations with market information in accordance with §1039.74 of the Milwaukee Wisconsin marketing order, §1045.75 of the Northeastern Wisconsin marketing order, and §1051.77 of the Madison Wisconsin marketing order.

## COMPARISON OF DAILY PRODUCER DELIVERIES TO DAILY CLASS I UTILIZATION

## HAVE YOU HEARD . . . . .

Laabs Cheese Co. plants which were closed earlier this year, have been purchased by Robert Cooper, owner of the Longwood Cheese Factory.

\* \* \* \* \*

Neilsville Milk Products Cooperative Creamery plant, closed since February, will be reopened by the North Central Dairymen's Cooperative of Owen.

\* \* \* \* \*

The National Commission of Food Marketing has reported a drop of nearly two-thirds in the number of processing fluid milk plants. Only 5,597 dairy plants were in operation in January 1965 compared to over 19,000 plants during 1948.

\* \* \* \* \*

Jerome Mueller has retired after nineteen years as a Milk Sanitarian for Sheboygan, Wisconsin.

\* \* \* \* \*

Sheldon Peterson has been appointed to the Board of Directors of Central Wisconsin Co-op Dairies of Westfield.

\* \* \* \* \*

U.S.D.A. amended the Rock River Valley Order to increase marketing area route disposition requirements for milk plants from the present 10% to 25% of total Grade A receipts, starting October 1, 1966.

\* \* \* \* \*

The first hearing to consider a Class I base plan for a Federal Milk Market was held August 23, 1966 at Seattle, Washington. The authority for this new type of base plan was contained in the Food and Agriculture Act of 1965.

\* \* \* \* \*

(Cont'd from Page 1)

approximately 3.72 percent. The present support price is 89.5 percent of the parity equivalent price as of the beginning of the current marketing year--very near the top of the 75 to 90 percent range provided for in the Agricultural Act of 1949. The support price for butterfat in farm-separated cream was increased from 59.4 to 61.6 cents a pound on April 1 and then to 68 cents on June 29.

Market prices of dairy products have been above the support level in recent months and farmers have received more than the support price. The U.S. average price of manufacturing milk (seasonally adjusted for milk fat test) in September was \$4.33 a hundredweight -- about \$1.00 above a year ago.

Since April 1 of this marketing year, the Department of Agriculture has not acquired any butter or cheese under the price support program, and only about one-third as much nonfat dry milk as in the same period last year.

The Department does not anticipate major changes in its support buying prices for butter, cheese, and nonfat dry milk under the 1967-68 program. The specific prices, however, will be announced later.

\* \* \*

USDA 3281-66
